 - Gorm
 - Wire
 - Laravel
- Livewire
 - Filament
 - Django
 - Jquery
- Mysql
 - Postgresql
 - Redis
 - S3 Minio
- Docker
 - Grafana
 - Prometheus
 - Otel
- Nginx
 - Rabbitmq
 - Git & Github

Education

- Sep 2018 –
Dec 2024

Swadharma Institute of Technology and Business

Bachelor's Degree in Computer Science, GPA: 3.29

Jakarta
- Sep 2022 –
Oct 2022

Bootcamp Dumbways

Full Stack Web Developer Bootcamp Batch 41

Depok

Experience

- Apr 2023 –
Aug 2025

Backend Developer - Indo Artha Technology

Developing APIs using a Go backend for mobile applications and dashboards, utilizing Laravel for the internal dashboard. The applications are specifically built for internal use within the Artha Group, such as AG Force, Kamela Run, Warung Berkah, SCBD App, and others.

Jakarta
- Jan 2025 –
May 2025

Fullstack Developer - Claverio Data Pratama

Building monolithic websites using Python Django Wagtail, such as company profiles, real estate agent sites, and others. Also responsible for setting up infrastructure components such as Docker, Nginx, Grafana, PostgreSQL, and more.

Jakarta
- Jan 2024 –
Feb 2024

Backend Developer - Eten Technology

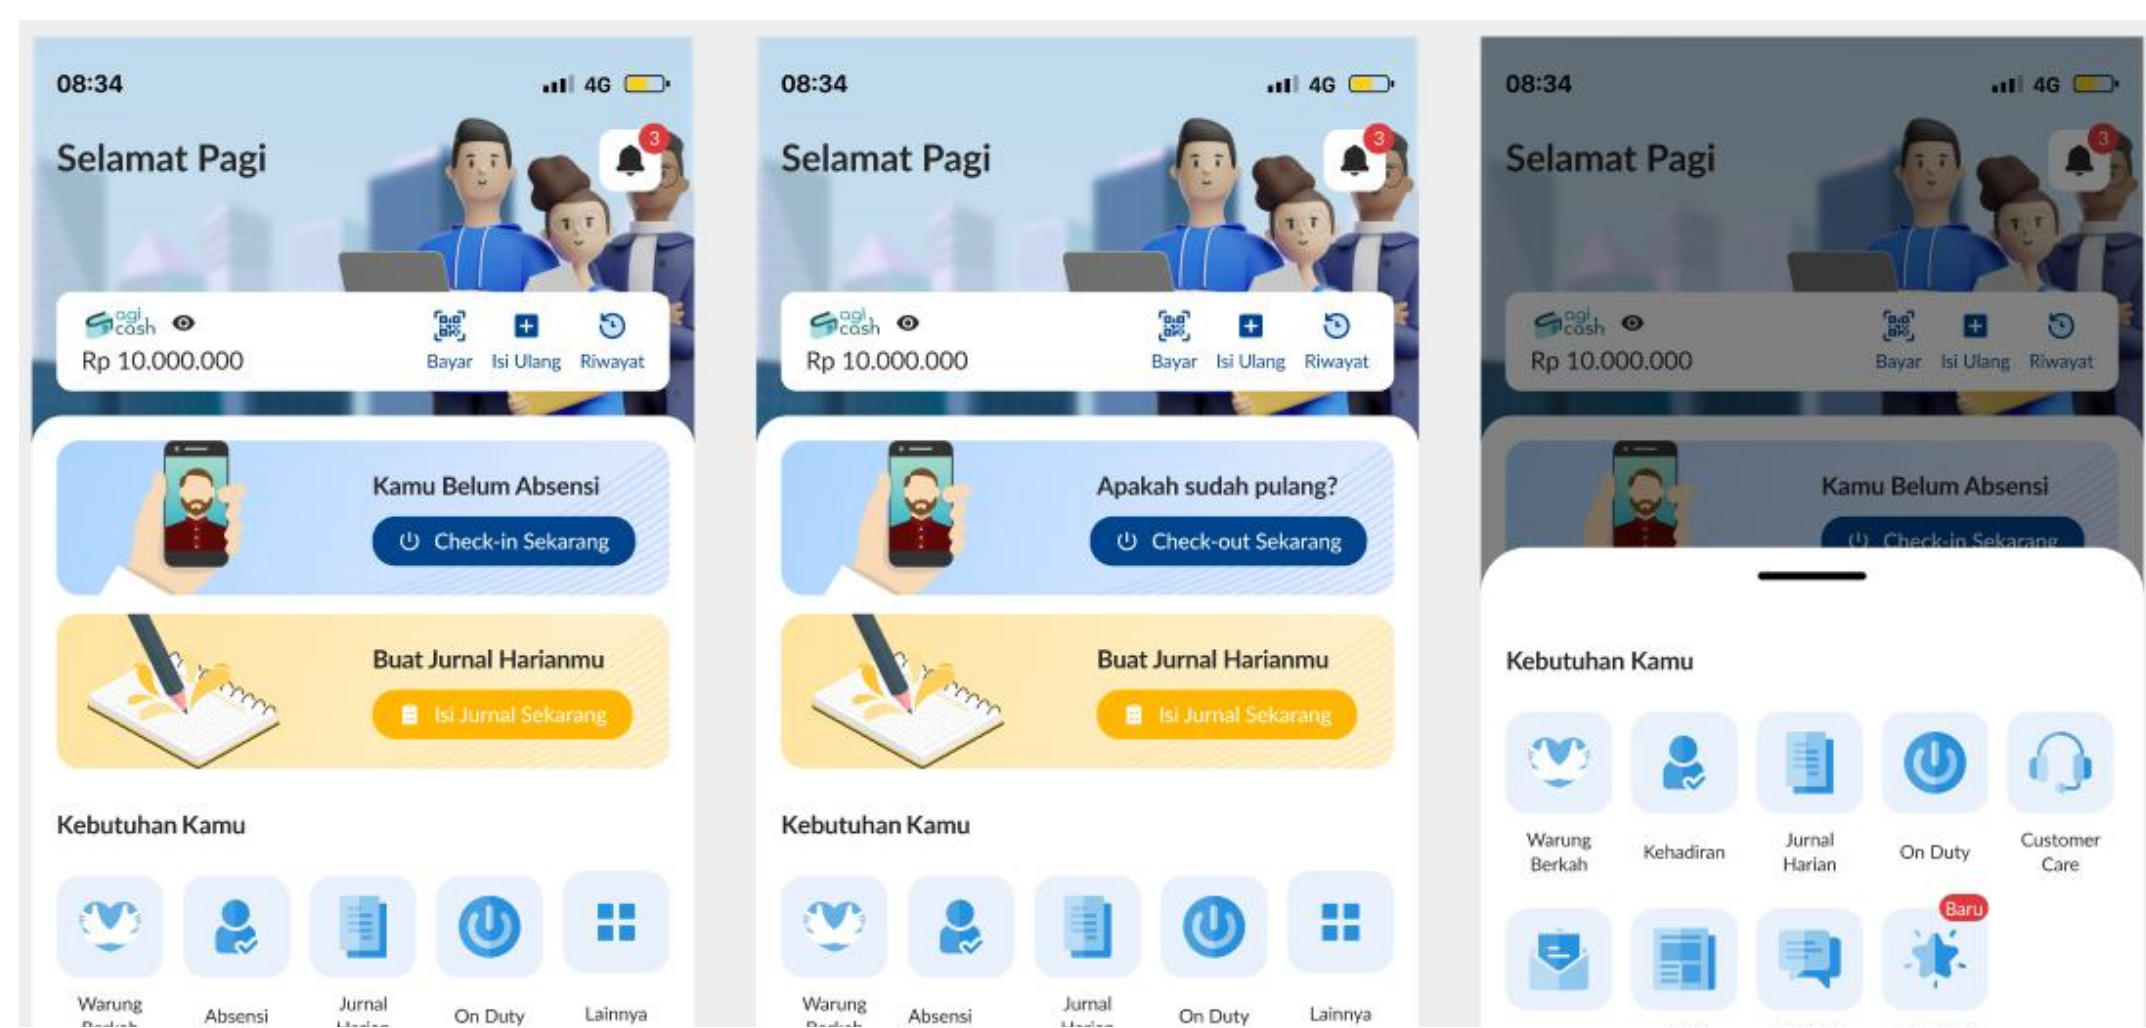

Developed APIs using Go (Golang) to power the seller dashboard, enabling sellers to manage their products, track performance, and interact with the system efficiently.

Jakarta

Portfolio Dicky

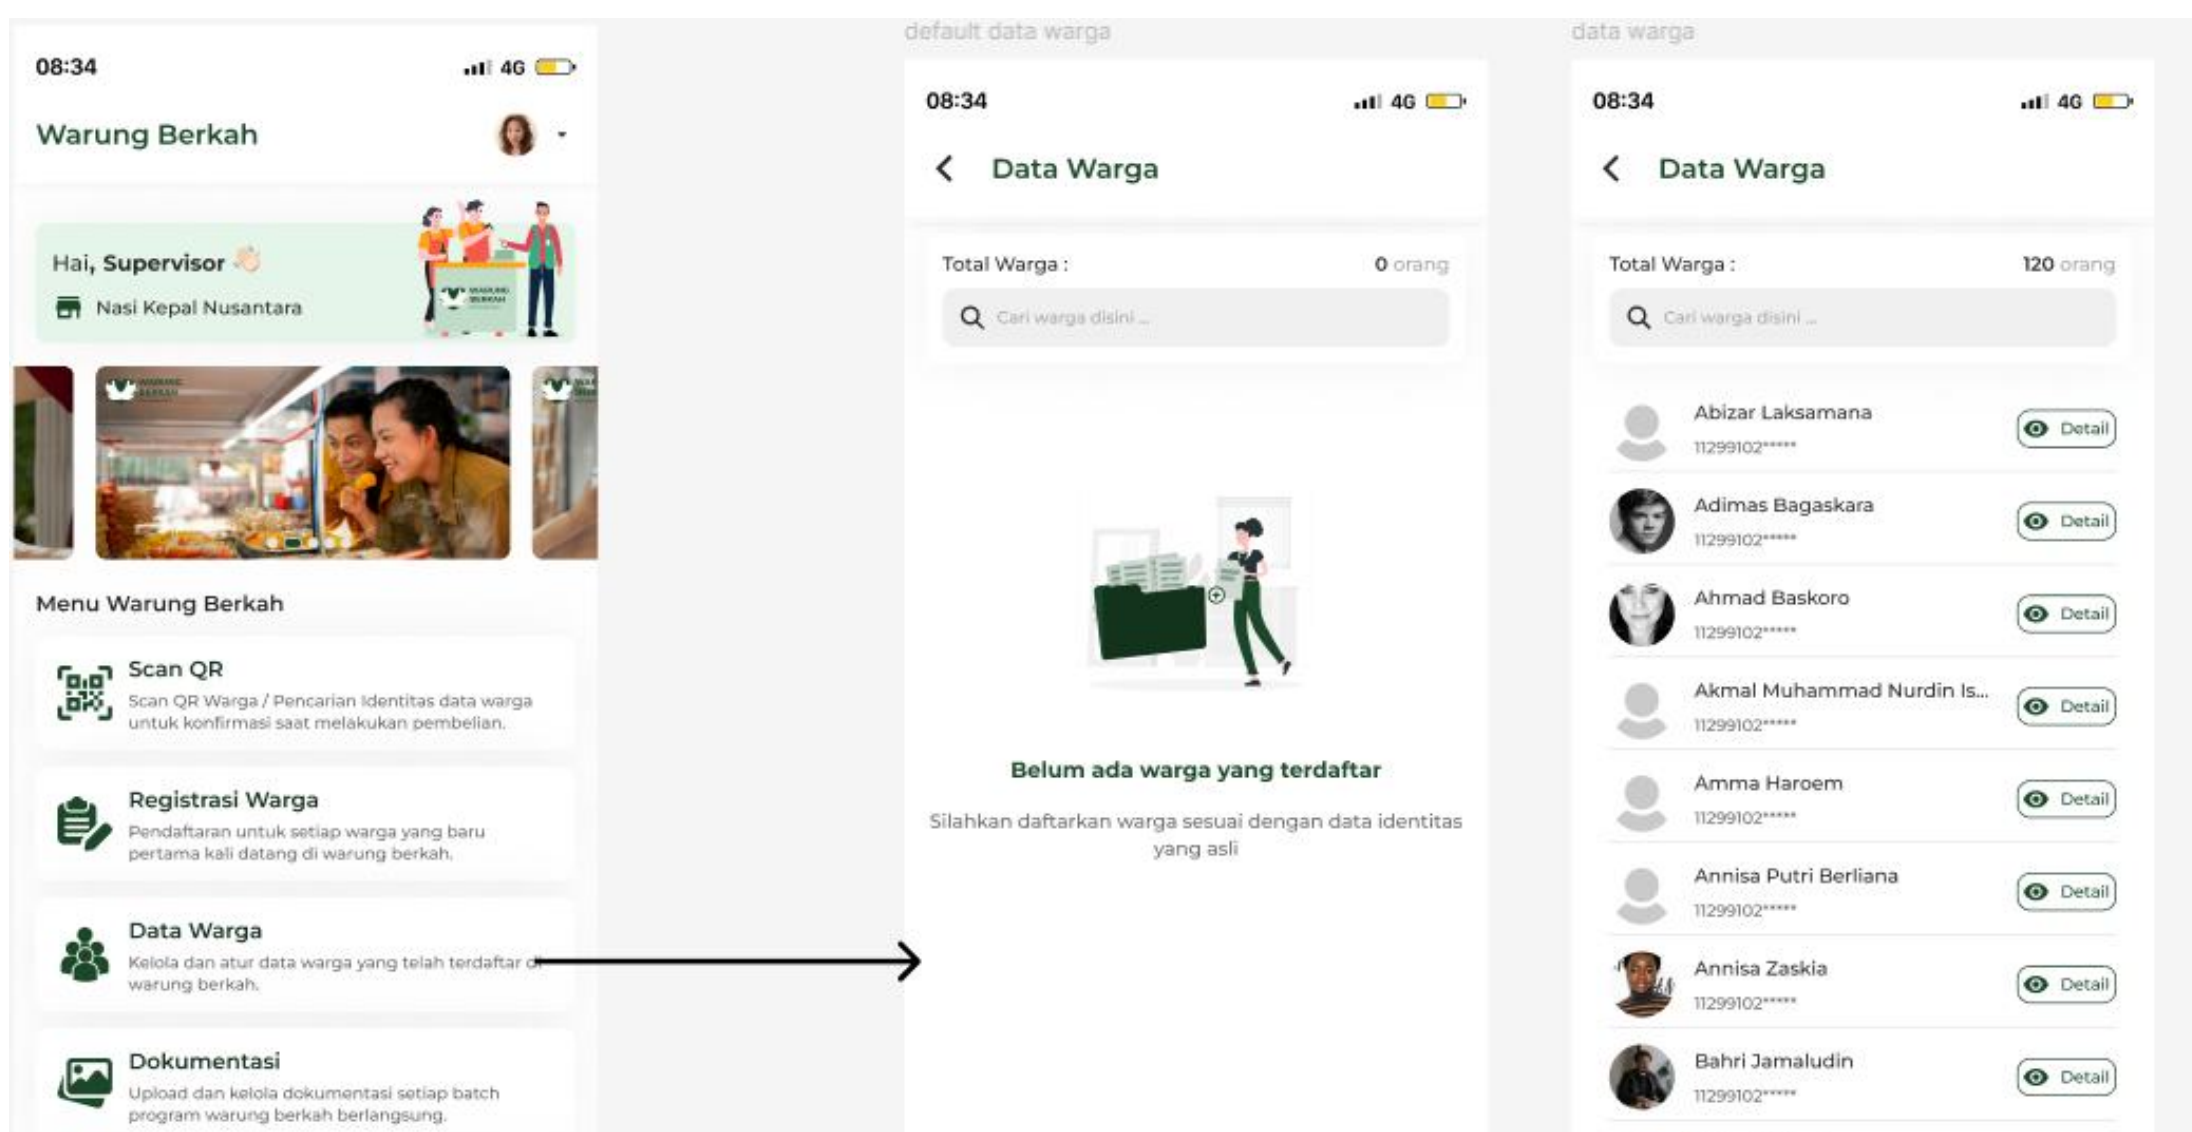

AG Force

Develop APIs using Golang and a monolithic Laravel backend for the internal HRIS application of Artha Graha Group.

AG Force - Warung Berkah

Created APIs for a dashboard and mobile application using Golang, integrated with AG Force user accounts.

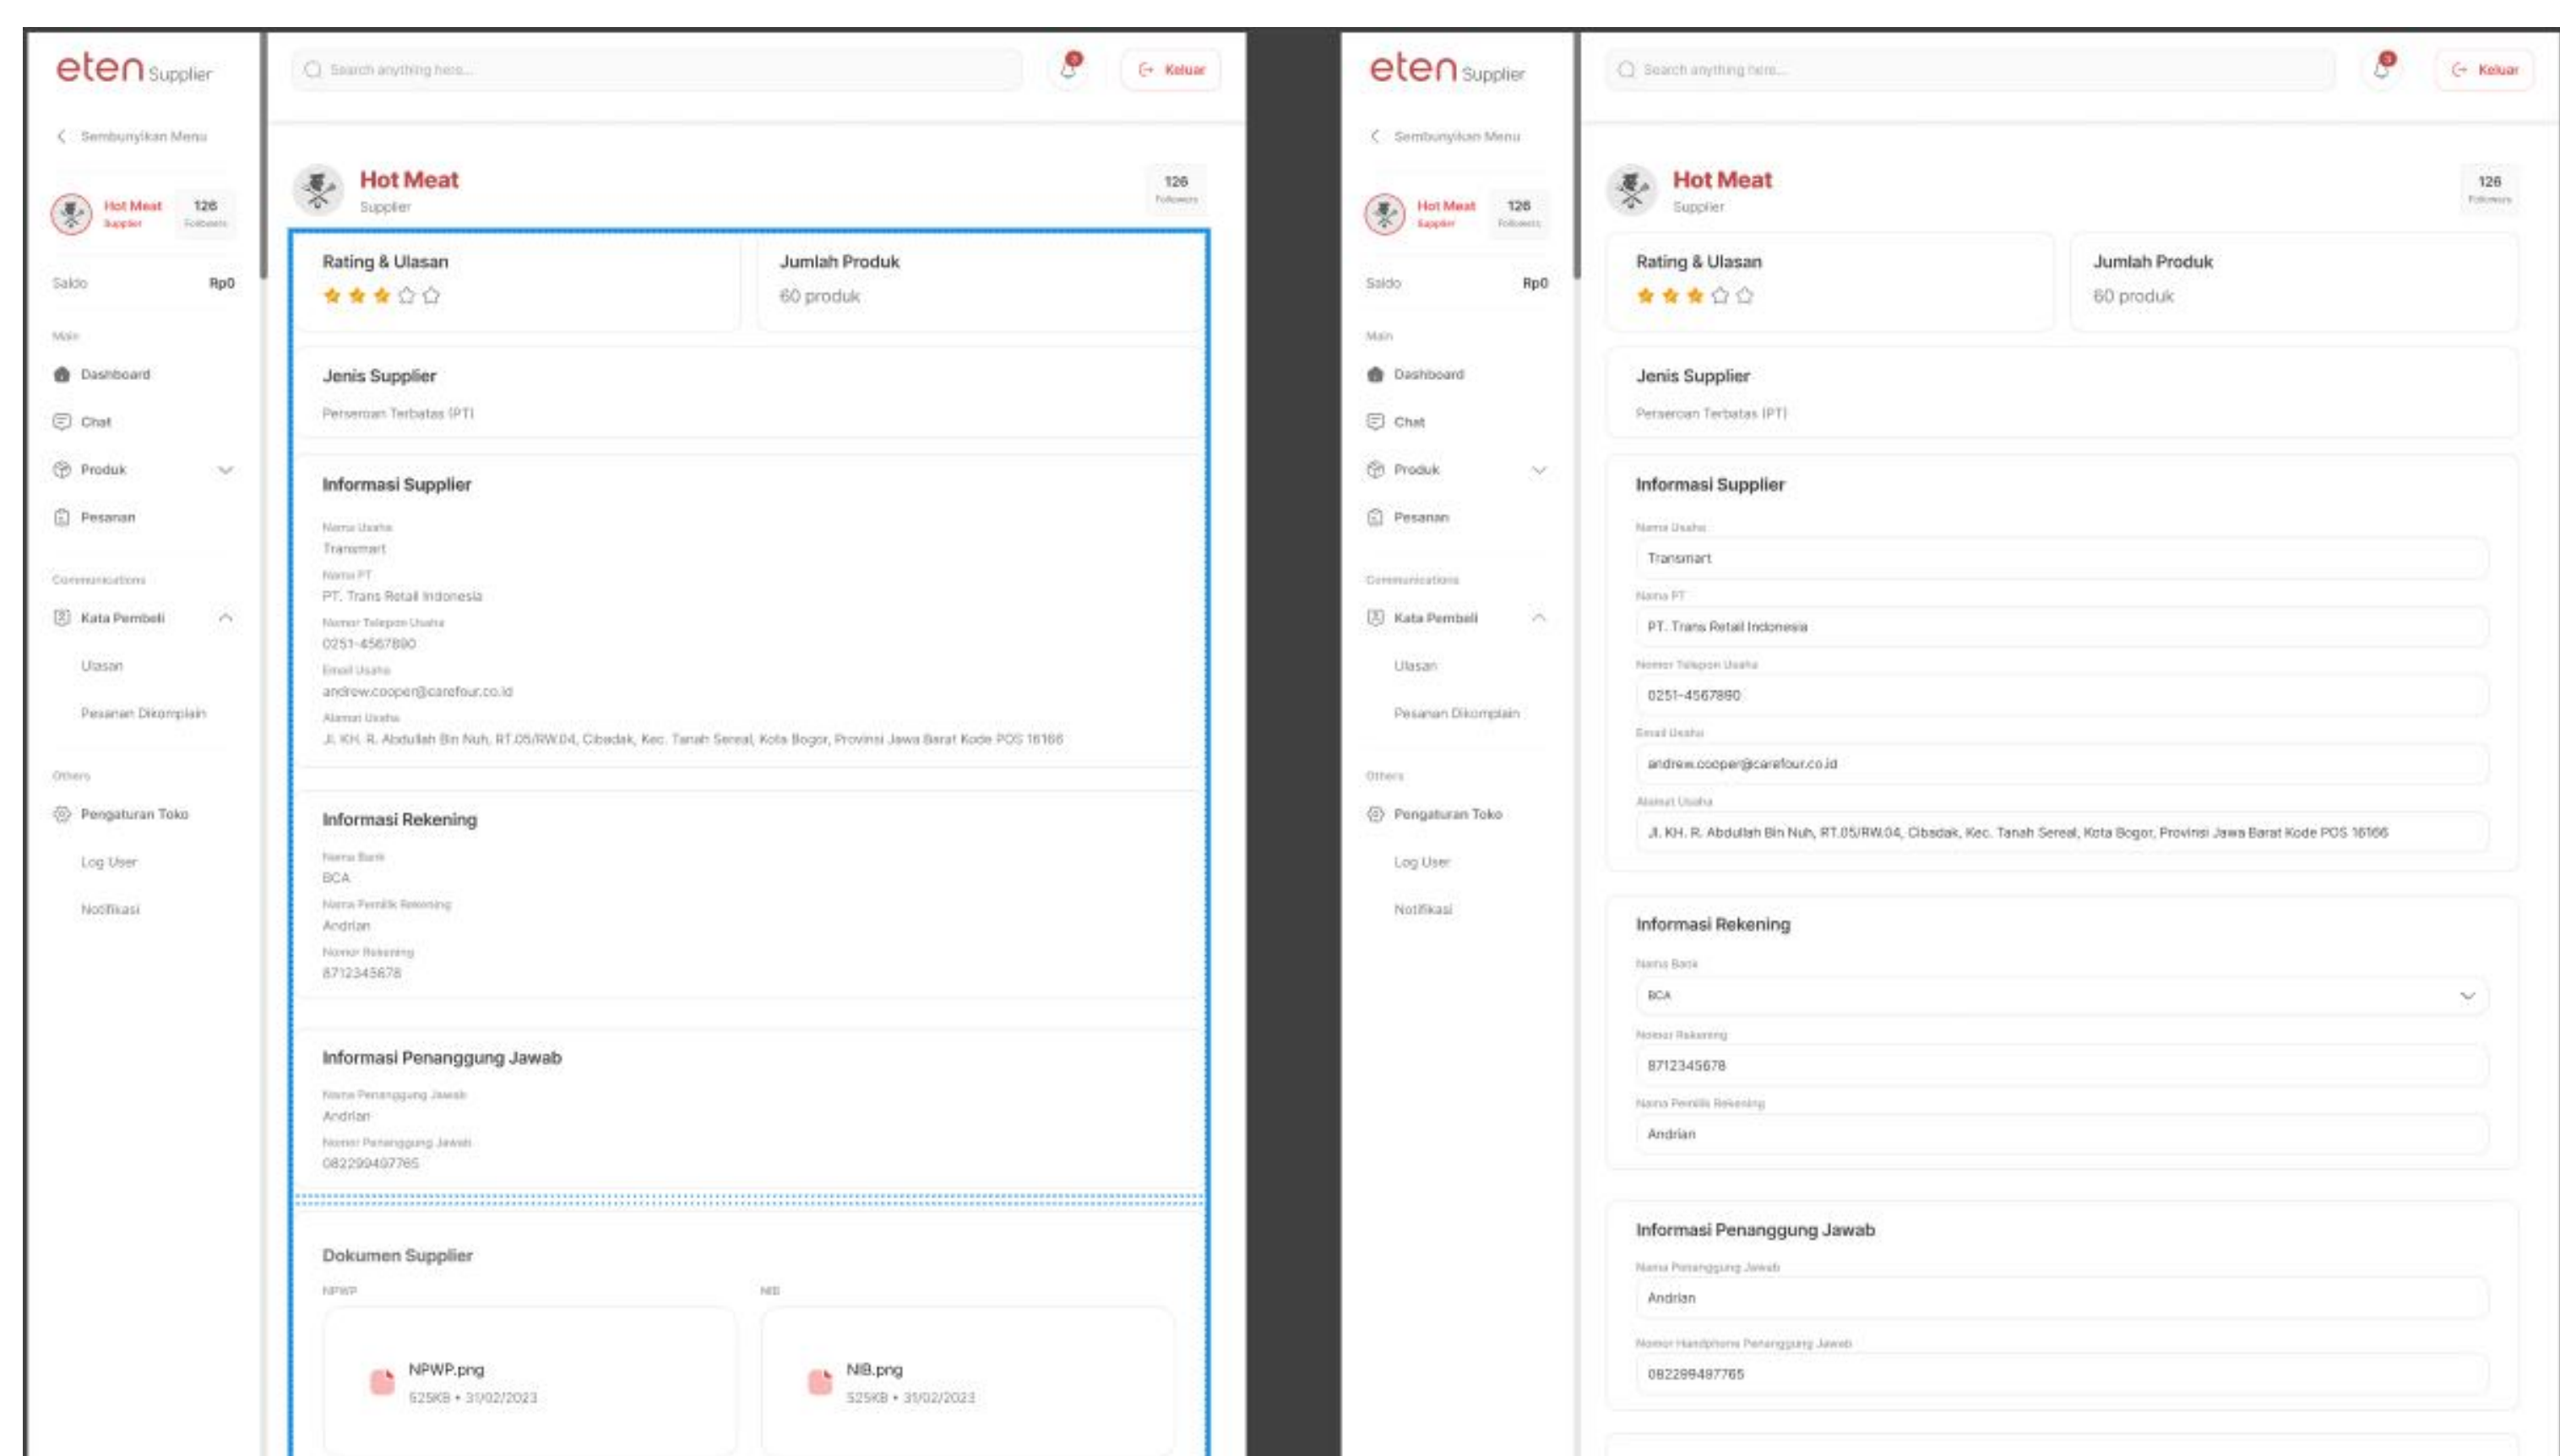

claverio.id

Created a company profile website using Django Wagtail CMS, including backend setup and DevOps tasks such as configuring Docker, Nginx, PostgreSQL, and CI/CD pipelines.capabilities.

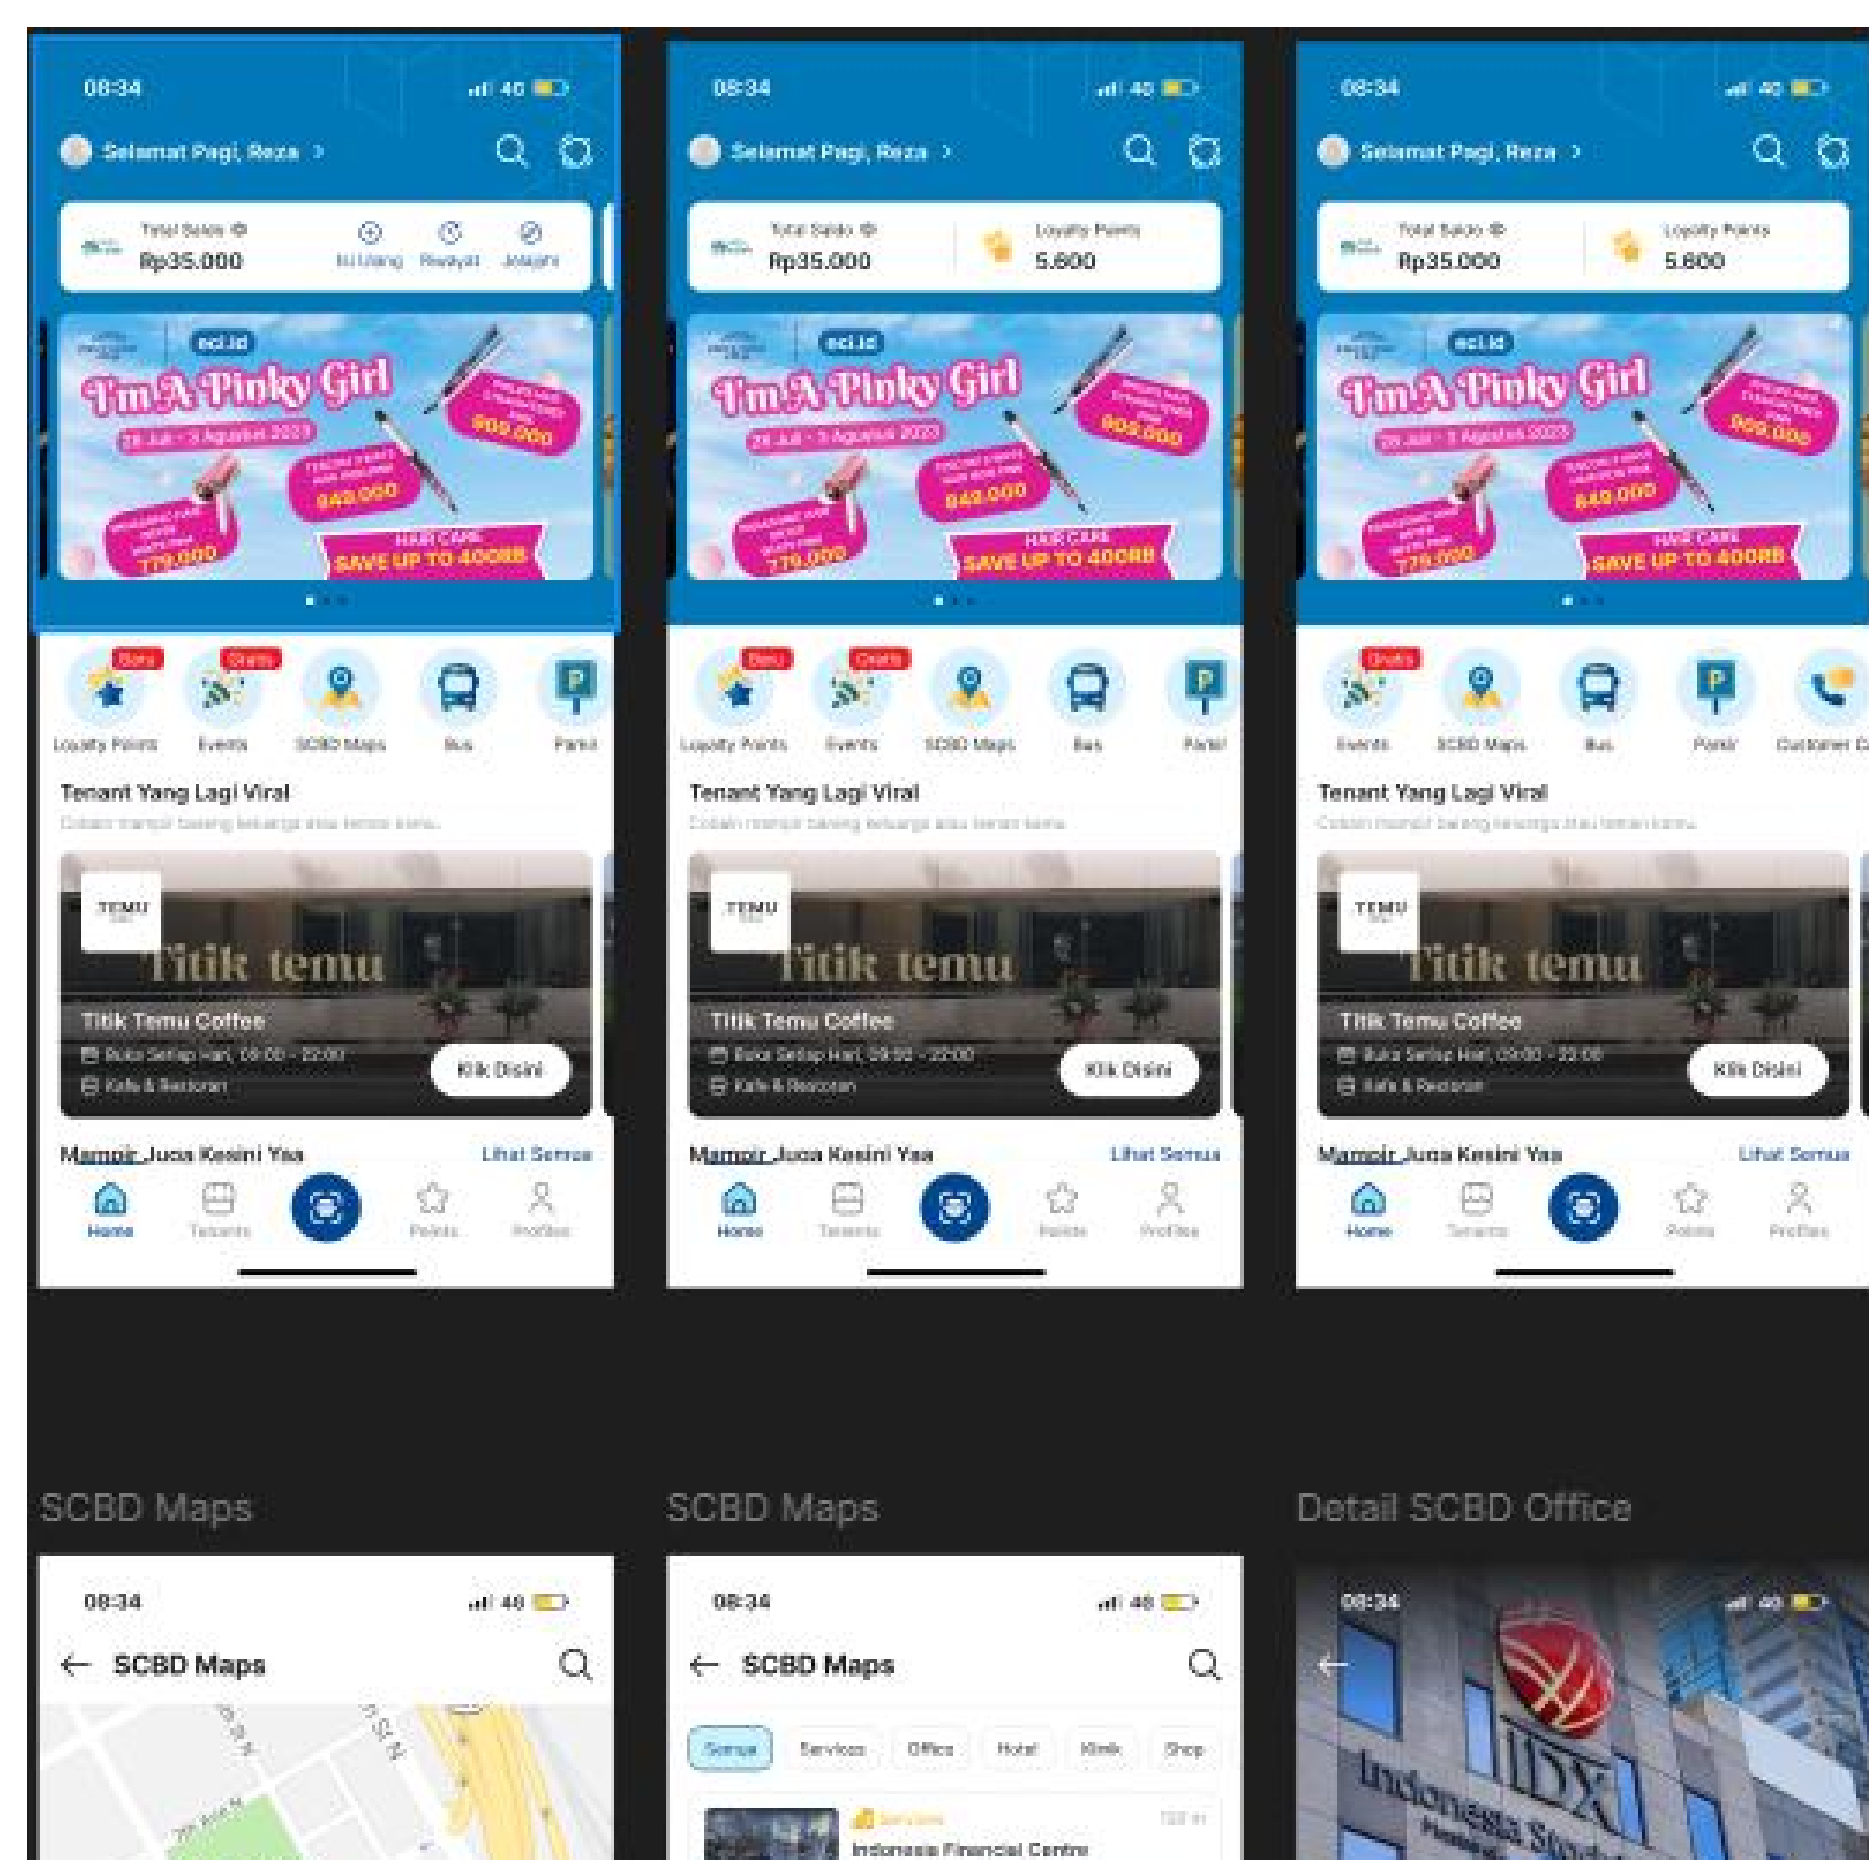

Eten - Dashboard Seller

Developed seller dashboard APIs using Golang, providing features such as product management, order tracking, sales analytics, and user control. The system is designed to optimize the seller experience and improve operational efficiency.

SBCD App

Built APIs using Golang for both mobile applications and dashboards, while using Laravel for the internal dashboard. The program is utilized in the SCBD area to provide information and services related to events, parking, maps, news, and other SCBD-related content.
